

# Austin Leung

austinle@andrew.cmu.edu || <https://github.com/austin-leung> || (917) 943-1081

## Education

### Carnegie Mellon University

Pittsburgh, PA

- Bachelor of Science: Double Major in Information Systems and Computer Science
- Quantitative Social Science Scholars Program

Class of 2022

GPA: 4.0/4.0

## Professional Experience

### Language Technologies Institute - Carnegie Mellon University School of Computer Science

Pittsburgh, PA

#### Data Research Assistant

May 2019 – Present

- Build data crawling mechanisms with web-based and python-based libraries retrieving data from APIs
- Run machine learning systems on gathered data to extract computational descriptors

### Adagio Digital Guitar School

Pittsburgh, PA

#### Technology Intern

May 2019 – Present

- Design a user-friendly website that serves as a platform for a monthly subscription e-learning service to make guitar learning more accessible
- Lead front and back-end development of the functioning web app from scratch to reach minimum viable product

### Russell Sage Math Team

New York City, NY

#### Math Team Instructor

Aug 2014 – Sep 2018

- Wrote weekly curriculum and problem sets for middle school math team classes to incorporate algorithmic thinking
- Coached students to prepare for the Mathcounts Competition leading to consecutive first place victories in Queens

## Projects

### Reddit Sentiment Analysis 1<sup>st</sup> Place - CodeDay Pittsburgh Spring 2019

Pittsburgh, PA

- Utilized IBM's Tone Analyzer API with Express.js and Node.js to analyze the overall sentiment of a website's comments and submissions with colors corresponding to different emotions and intensities
- Built a web app and Google Chrome extension using React to visualize colored sentiment of subreddit submission titles, comment chains, or a user's activity retrieved from the Reddit API

### Mahjong AI Game

Pittsburgh, PA

- Developed a fully functional Mahjong game with multiplayer functionality within a Python GUI
- Designed a strong artificial intelligence process with heuristic values and game trees to suggest optimal moves for a user-centric assist mode training player strategy

### Find the Sets Game

New York City, NY

- Created a time-based game on Java and Processing matching sets of images based on shape, color and background
- Designed a cognitive game assessing and tailoring its level of difficulty to a player's reaction time

### Butterwood Bake Consortium Website

Pittsburgh, PA

- Redesigned the front-end of a website using HTML, CSS, and JavaScript for a local Pittsburgh bakery to ease navigation, mobile responsiveness, and user experience
- Redeveloped the bakery's back-end website databases with MySQL to process orders and contact information

## Skills

### Programming Languages

- Python
- C
- Java
- R
- HTML
- CSS
- JS/React/Node
- SQL

### Technical Skills

- Working with APIs
- Front-End Web Development
- Database Design and Data Modeling
- Statistical Data Analysis

### Relevant Coursework

- Principles of Imperative Computation (7A)
- Fundamentals of Programming and CS
- The Information Systems Milieu
- Methods for Statistics & Data Science
